# APPENDIX – NON-GAAP RECONCILIATION

## RECONCILIATION OF GAAP TO NON-GAAP FINANCIAL MEASURES – EQUITY

### Non-GAAP Financial Measures

This presentation contains the tangible book value per share, a non-GAAP financial measure. Tangible common stockholders' equity is calculated by excluding intangible assets from stockholders' equity. For this financial measure, the Company's intangible assets are goodwill and core deposit intangible. Tangible book value per share is calculated by dividing tangible common shareholders' equity by the number of common shares outstanding. The Company believes that this non-GAAP measure is consistent with the capital treatment utilized by the investment community, which excludes intangible assets from the calculation of risk-based capital ratios and presents this measure to facilitate comparison of the quality and composition of the Company's capital over time and in comparison to its competitors.
